Attention: Mr. W. G. Shaw, President

Gentlemen:

I am writing in reference to your letter dated March 8, 1978, which outlined your organization's objections to an NPDES Permit to Discharge granted to the Burns Cold Forge Company located at 9312 Arrow Road, N.W., Minerva, Ohio, Carroll County. We appreciate your response to the public noticing of this permit and also your concern for the preservation of our state waters. We would also like to offer our congratulations to the Minerva Sportsman's Club for the fine work the organization has done to encourage further use of our natural environment in the Minerva Area.

In reference to the NPDES Permit to Discharge issued to the Burns Cold Forge Company, you are correct in that the permit gives the company the right to discharge oil and grease to Still Fork Creek, but it should also be noted that the permit contains limitations on the amounts of these pollutants which may be discharged. These limitations are well below the amount of pollutants which we feel would have any impact on Still Fork Creek.

I would again like to thank your organization for their concern for our environment and if you have any questions, please feel free to contact me at this office at (614) 385-8501.

Sincerely,

Donald T. Fulkerson
Environmental Scientist
Office of Wastewater Pollution Control
